- a. Extract driver files from SetupRST.exe:
  - Open terminal in the directory with SetupRST.exe by right-clicking the directory and selecting "Open in Terminal" or "Open PowerShell here"
  - Enter the following command:  
SetupRST.exe -extractdrivers SetupRST\_extracted
- b. Copy all driver files from the SetupRST-extracted to a USB key media.
- c. For Microsoft Windows OS\*:
  - During the operating system installation, click 'Load Driver' to install a third party SCSI or RAID driver.
- d. When prompted, insert the USB media and press Enter.
- e. Follow the prompts and browse to the location of the installation files. Select the appropriate '.inf' file (64 or 32 bit). If a supported controller is detected there will be no error message. Follow prompts to continue and complete the installation.
